

IDICHUS Foundation – ANNOUNCE (ref. Ctto 022/2011)

Project manager open position at the Health Research Institute of Santiago de Compostela (IDIS) in Santiago de Compostela, Spain,

Project

The Foundation IDICHUS / IDIS / SERGAS is participating in an European collaborative project that aims to undertake a large-scale genomic study to identify the genes, and biological pathways they control, which determine susceptibility and severity in life-threatening bacterial infections of childhood in Europe and globally. The project will utilize already established large and highly characterized cohorts as well as newly recruited cohorts of patients with life threatening bacterial infections from across Europe and West Africa.

We are searching for an outstanding and motivated project manager to join us to implement and pursue project management and reporting within a challenging project.

Job Specification

He or she will be responsible for:

- (i) implementation and refinement of project management processes,
- (ii) project controlling and reporting,
- (iii) maintenance of electronic communication within the network,
- (iv) coordination and participation in project meetings,
- (v) development and implementation of quality management processes and
- (vi) application for new research grants

We expect...
