

IDICHUS Foundation – ANNOUNCE (ref. Ctto 023/2011)

Pediatrician and Clinical Researcher open position at the Health Research Institute of Santiago de Compostela (IDIS) in Santiago de Compostela, Spain,

Project

The Foundation IDICHUS / IDIS / SERGAS is participating in an collaborative project that aims to undertake a large-scale genomic study to identify the genes, and biological pathways they control, which determine susceptibility and severity in life-threatening bacterial infections of childhood in Europe and globally.

The project will utilize already established large and highly characterized cohorts as well as newly recruited cohorts of patients with life threatening bacterial infections from across Europe and West Africa. It will be funded by the 7th Framework Programme for Research and Technological Development of the European Union.

We are searching for an outstanding and motivated pediatrician and clinical researcher to join our team.

Job Specification

He or she will be responsible for:

As a clinical researcher:

- (i) all clinical duties related to local implementation and development of different ongoing research projects (patient selection, recruitment, data collection, publication and diffusion...),
- (ii) subinvestigator tasks in randomized clinical trial run from our clinical trials unit,
- (iii) participation in project meetings,
- (iv) mid-term development of his/her own related research lines.

As a practitioner (workload up to 96 hours a month, 4 x 24 hours duty):

- (i) common pediatricians job duties.

We expect...

Required merits/skills

- Specialization in Pediatrics.
- Valid and recognized title to work in Spain.
- The candidate must have excellent communication and interpersonal skills and be capable of working within an interdisciplinary team.
- The candidate must have excellent written and verbal skills both in Spanish and English.
